EXECUTIVE SUMMARY

This report analyzes:

8652 Indian Restaurants	Across 43 cities	Using Zomato data
-------------------------	------------------	-------------------

The Study Compares:

Restaurant density	Cuisine diversity	Customer ratings
Pricing	Online delivery adoption	Leading restaurants

The analysis highlights major food hubs such as:

New Delhi	Mumbai	Bangalore
Hyderabad	Pune	Gurgaon

PROJECT OBJECTIVES

- Compare restaurant ecosystems across Indian cities.
- Measure restaurant density and market concentration.
- Identify the most diverse food markets.
- Analyze ratings and customer satisfaction.
- Compare average dining costs.
- Evaluate online delivery penetration.
- Identify top-performing restaurants using ratings and votes.
- Generate insights for restaurant owners, investors, and food-tech platforms.

METHODOLOGY

The dataset was filtered for Country Code = 1 (India). Aggregations were performed using MS Excel. City-level metrics included restaurant count, average rating, average cost for two, online delivery percentage, and cuisine diversity. A combined restaurant performance score was calculated using Rating.

INDIAN FOOD MARKET OVERVIEW

India's restaurant market is highly concentrated in large metropolitan regions. NCR dominates the dataset, followed by major cities such as Mumbai, Bangalore, Hyderabad, Chennai, Pune, Kolkata, Ahmedabad, and Jaipur. These cities show strong demand for both dine-in and delivery-based food services.

CITY-WISE COMPARISON

The table below compares the leading Indian cities on key restaurant metrics.

City	Restaurants	Avg Rating	Avg Cost	Delivery %	Cuisine Diversity
New Delhi	5473	2.44	596	27.2	81
Gurgaon	1118	2.65	714	38.0	71
Noida	1080	2.04	539	33.7	49
Faridabad	251	1.87	448	13.9	30
Ghaziabad	25	2.85	602	40.0	14
Guwahati	21	4.19	821	0.0	18
Lucknow	21	4.20	860	0.0	18
Bhubaneshwar	21	3.98	679	0.0	19
Ahmedabad	21	4.16	857	52.4	21
Amritsar	21	3.69	481	0.0	11
Allahabad	20	3.40	518	0.0	14

Varanasi	20	3.51	505	0.0	12
Coimbatore	20	4.13	782	35.0	21
Chennai	20	4.31	1085	65.0	21
Bhopal	20	3.95	620	0.0	11

RESTAURANT DENSITY ANALYSIS

The largest restaurant market in the dataset is New Delhi, followed by Gurgaon and Noida. High restaurant density indicates stronger competition, greater consumer demand, and higher cuisine variety.

CUISINE DIVERSITY ANALYSIS

The most diverse city is New Delhi with 81 unique cuisine combinations. Large metropolitan markets generally support a wider variety of domestic and international cuisines.

- New Delhi: 81 cuisine categories
- Gurgaon: 71 cuisine categories

- Noida: 49 cuisine categories
- Faridabad: 30 cuisine categories
- Mumbai: 26 cuisine categories
- Hyderabad: 24 cuisine categories
- Pune: 23 cuisine categories
- Puducherry: 22 cuisine categories
- Vizag: 22 cuisine categories
- Coimbatore: 21 cuisine categories

RATINGS ANALYSIS

Average ratings indicate customer satisfaction and restaurant quality. Cities with strong ratings often maintain better consistency and service quality.

COST ANALYSIS

Average Cost for Two is used as a proxy for market pricing. Premium urban centers typically show higher average costs because of higher operating expenses and affluent customer segments.

ONLINE DELIVERY ADOPTION

Mohali: 100.0% restaurants offer delivery

Chennai: 65.0% restaurants offer delivery

Ahmedabad: 52.4% restaurants offer delivery

Jaipur: 50.0% restaurants offer delivery

Nagpur: 50.0% restaurants offer delivery

Secunderabad: 50.0% restaurants offer delivery

Kolkata: 40.0% restaurants offer delivery

Ghaziabad: 40.0% restaurants offer delivery

Hyderabad: 38.9% restaurants offer delivery

Gurgaon: 38.0% restaurants offer delivery

TOP-RATED RESTAURANTS (RATING + VOTES SCORE)

Restaurant	City	Rating	Votes
Toit	Bangalore	4.8	10934
Truffles	Bangalore	4.7	9667
Barbeque Nation	Kolkata	4.9	5966

AB's - Absolute Barbecues	Bangalore	4.6	6907
Mirchi And Mime	Mumbai	4.9	3244
Big Brewsky	Bangalore	4.5	5705
Hauz Khas Social	New Delhi	4.3	7931
Naturals Ice Cream	New Delhi	4.9	2620
Peter Cat	Kolkata	4.3	7574
Big Chill	New Delhi	4.5	4986
Le Plaisir	Pune	4.8	2510
Indian Accent - The Manor	New Delhi	4.9	1934
Gulati	New Delhi	4.4	4373

AI-GENERATED FOOD MARKET ANALYSIS

NCR remains India's largest and most competitive food-service market, supported by dense urban populations and a large variety of cuisines. Bangalore and Hyderabad benefit from strong technology-sector demand and a young professional workforce. Mumbai demonstrates premium dining potential with higher spending capacity, while Pune and Chennai represent balanced growth markets. Cities with high cuisine diversity are attractive for new restaurant concepts because consumers are more willing to experiment with different food categories. Online delivery continues to reshape the market, creating opportunities for cloud kitchens and delivery-first brands. Restaurant operators should prioritize customer ratings, digital visibility, and differentiated cuisine offerings to remain competitive.

KEY FINDINGS

1. Restaurant activity is concentrated in major metropolitan regions.
2. Cuisine diversity is highest in large urban markets.
3. Higher ratings are not always associated with higher pricing.
4. Delivery adoption is a major competitive advantage.
5. Top-performing restaurants combine excellent ratings with strong customer engagement.

CONCLUSION

The Zomato India dataset reveals substantial differences between cities in restaurant concentration, diversity, pricing, and customer satisfaction. The findings provide actionable insights for market-entry decisions, competitive analysis, restaurant expansion, and food-tech strategy development.
